Model	ST60	
Standard tank	0	I
Optional tank	0	I
Oversized tank*	0	I
CANOPY & SILENCER		
Canopy model	C60/07	
Silencer model	MSR/a 200	
Silencer outlet diameter	219.0	mm

tandard reference conditions temperature 25°C, altitude 100m asl, relative humidity 30%. tmospheric pressure 100 kPa (1 bar), power factor 0.8 lag, balanced load - non istortional. Fuel consumption is nominal and refers to specific weight 0,850kg/l. Sound bisorronal, refer to free field conditions: the installation site may influence the values. Dimensions, weights and other specifications contained in the technical data sheet and elated attachments are nominal, subject to tolerances and refer to the model with standard equipment; any optional and additional equipment/accessories can modify weight, dimensions, performance. **P.R.P. Prime Power-Continuous power at variable load:** dimensions, performance. **P.R.P. Prime Power-Continuous power at variable load**: The power that a genset can supply in continuous service at a variable load for an unlimited number of hours per year while respecting the maintenance intervals established in the environmental conditions stated by the Manufacturer. according to ISO8528-1. The average bower supplied over time and any applicable overload must be less than the percentages stated by the Manufacturer. **E.P. - Emergency power**: This is the maximum power that a generating set can deliver for a limited number of hours per year while complying with the maintenance frequency stipulated under the environmental conditions set by the Anufacturer. The number of hours per year is determined by the engine manufacturer. The average power output over time must be lower than the percentages set by the engine manufacturer. Overloading is not allowed.
